

What is the UVM Autism Collaborative?

The UVM Autism Collaborative is a group of autistic and non-autistic people working together to improve the quality of life for people who are autistic.

CURRENT ACTIVITIES:

- Building a dedicated network of researchers, health care professionals, caregivers and people on the autism spectrum.
- Conducting research
- Publishing a monthly newsletter
- Sharing autism resources

Dedicated to improving the quality of life for autistic people everywhere.

Who are the UVM Autism Collaborative?

The UVM Autism Collaborative consists of researchers, clinicians, PhD candidates, UVM graduate & undergraduate students, caregivers and family members..

The UVM Autism Collaborative is part of the Center on Disability and Community Inclusion (CDCI) at the University of Vermont.

COLLABORATIVE MISSION:

We believe that healthcare should concentrate on the quality of life and community inclusion of autistic people and their caregivers.

We wholeheartedly believe that our goals will be achieved through interdisciplinary practice.

“Interdisciplinary practice” means that people from many different backgrounds are working together to achieve the same goals.

We collaborate across disciplines and involve all stakeholders, especially autistic people, their families, and friends.

UVM AUTISM COLLABORATIVE

Learn about our research

The UVM Autism Collaborative is dedicated to promoting and conducting meaningful research.

Become a member

All stakeholders from the autism community are welcome to apply to become members.
