

What is PedsProVT?

The Pediatric Professionals Collaborative of Vermont (PedsProVT) is a professional development and support network.

We are a network of interdisciplinary professionals — allied health, early intervention, assistive technology, special education — serving infants, children, and youth with complex needs in Vermont.

Building relationships, sharing knowledge, and bridging disciplines in pediatric care in Vermont.

THE LIST-SERV

A few times per week, members of the list-serv will post resources they've found helpful, or ask for help with professional topics and situations.

Additionally, the PedsProVT coordinator, **Adrienne Miao**, posts a monthly round-up of quicklinks, upcoming events, and professional considerations to the list-serv.

OUR GOALS:

- Sharing knowledge
- Building professional relationships and connections
- Amplifying our shared vision of all children actively participating, learning, growing, and experiencing wellness in their homes, schools, and communities.
- Commitment to collaborative teaming and bridging disciplines
- Evidence based practice to advance knowledge-to-action
- A holistic perspective on health and disability rooted in the ICF model and family-centered care.

Join our email list-serv

Our private email list-serv puts pediatric professionals in touch to share opportunities, ask questions, and offer support.

Access professional development & training

PedsProVT offers specialized technical webinars and forums for pediatrics professionals.
